

Ampacoll® Reflecto Tape

Aluminium vapour deposited PE adhesive tape

- > Weather and age-resistant
- > Easy to tear off by hand
- > Easy to use
- > Very high adhesive strength
- > Extremely robust and durable
- > Serrated – easy to tear off by hand

Technical details	Value
Support system	PE/PET membrane, metallised (29µ)
Pressure sensitive adhesive	Dispersion acrylate
Storage	UV-protected, cool and dry (at max. +23°C)
Application temperature	0°C to +40°C (with clean and dry substrate)
Temperature resistance	-30°C to +80°C
Resistance to ageing	>20 years
Natural weathering period	2 months

 **ISO 9001**
Swiss Research

Area of application: Metallised PE/PET adhesive tape for internal and external use. It functions as a reliable diffusion barrier, as well as interface bonding on aluminium-clad insulation systems.

Available as			
Item no.	Identification	Roll size	Box contents
7640115537874	Ampacoll® Reflecto Tape	50 m × 60 mm	10 rolls = 500 metres

Suitable for use on:

Application tips

Surfaces must be clean, dry and free of dust, ice and grease prior to adhesion. The ambient temperature, the surface temperature and the temperature of the adhesive tape must correspond to the specified working temperature. Installed membranes should be tension-free and even. The adhesive tape must be applied tension-free following the uneven surface of the substrate and pressed down firmly.

Ampacoll® Reflecto Tape adheres immediately to the substrate. Mechanical loads caused by objects being dragged around, intensive walking or similar must be avoided.

Please observe the recommendations for use and further system products in our adhesives matrix
